

河北省第三次全国土壤普查

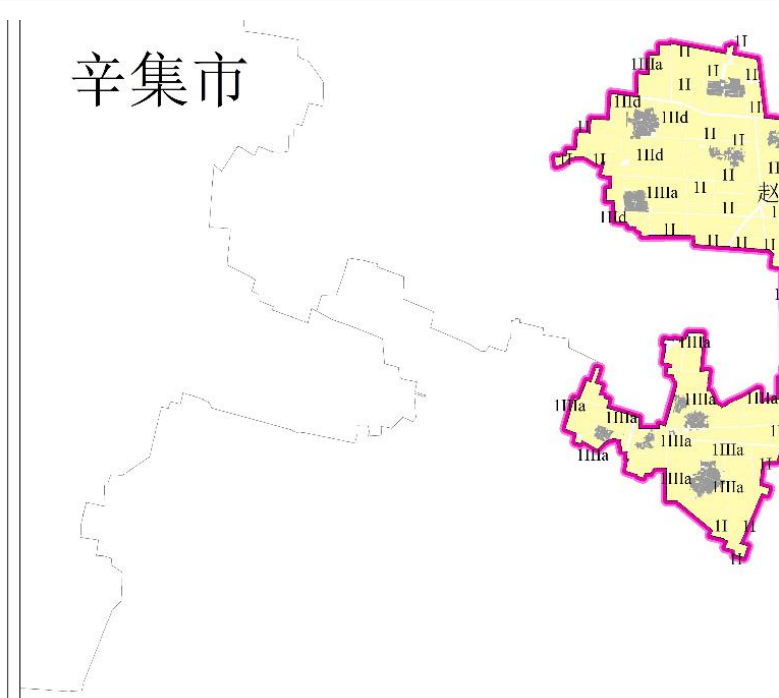

土壤农业利用适宜性评价成果质控表

|      |               |       |          |
|------|---------------|-------|----------|
| 被检单位 | 河北满山红农业科技有限公司 | 区县/市名 | 桃城区      |
| 质控结果 |               | 质控日期  | 2026.9.6 |

问题截图及备注

| 序号 | 问题截图                                                                                 | 备注                               |
|----|--------------------------------------------------------------------------------------|----------------------------------|
| 1  |     | GDB 数据库命名不符合规范，且不全               |
| 2  |   | 数据库中缺少适宜性评价单元图、行政区划图等矢量数据        |
| 3  |  | 图件成果中，缺少土壤类型图、土地利用现状图等           |
| 4  |                                                                                      | 请检查字段命名和类型是否符合规范，矢量数据是否包含所有必要的字段 |

| 序号 | 问题截图                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 备注           |        |        |        |      |      |      |      |      |      |        |      |          |      |      |      |      |      |      |      |    |      |       |        |        |       |   |   |     |   |      |      |        |       |      |      |      |   |   |   |   |   |   |       |      |     |   |     |   |   |   |   |   |   |      |       |      |       |       |   |   |      |   |   |   |       |       |     |      |     |   |   |   |   |   |   |      |    |  |  |        |        |        |   |   |      |   |      |      |        |           |

| 12 | <div><div>(2) 地表砾石丰度</div><p>地表砾石丰度影响耕作难易和土壤保水保肥能力。依据地表直径大于 2 mm 的砾石覆盖面积比例,划分为五个等级:1 级无砾石 (&lt;1%)、2 级少砾石 (1%-5%)、3 级中砾石 (6%-10%)、4 级多砾石 (11%-30%)、5 级很多砾石 (&gt;30%)。衡水市桃城区绝大部分耕地为无砾石或少砾石等级,局部河道冲积区可能出现中砾石或多砾石,评价时依三普外业调查数据赋值。</p></div> | 核查地表砾石丰度的分级阈值是否与规范一致 |
